

**Long Beach Airport Concessions**  
Long Beach, California

**The Long Beach Airport (LGB) renovation includes almost 10,000 sf of new retail and restaurants. A market hall flanks two new terminal buildings, supplementing the original 1940s terminal, and features a variety of Long Beach-based businesses.**

Spaces are designed to reflect each unique retailer while remaining modern in style to complement the design of the buildings. To leverage Southern California's temperate climate, three distinct outdoor patios

comprising 4,200 sf were integrated. Features include a fire pit and fire table, living wall, cabanas, and an area for outdoor performances. Construction for this project was completed in 2.5 months. Client: The Paradies Shops
